

HOLLAND Kingpins

Product/Process Change for HOLLAND Kingpins

Impacted Kingpin Models:

- | | | |
|------------|--------------|--------------|
| • KP-AAR-3 | • KP-AAR-3-C | • KP-AAR-3-E |
| • KP-AAR-4 | • KP-AAR-4-C | • KP-AAR-4-E |
| • KP-AAR-5 | • KP-AAR-5-C | • KP-AAR-5-E |
| • KP-AAR-L | • KP-AAR-L-C | • KP-AAR-L-E |

Effective Date: September 2022

Process Change:

The addition of a new supplier for heat treat processing of HOLLAND Kingpins.

Attention:

In order to meet capacity demands, SAF-HOLLAND will begin using an additional supplier for the heat treatment process for HOLLAND KP-AAR and KP-AAR-L Kingpins.

Starting in September 2022, HOLLAND Kingpins that have received heat treating from this supplier will be delivered to OEMs.

The primary reason for an additional heat treatment supplier is to meet the demand for increased capacity. All material specifications, forging processes, inspections and NDT procedures will remain unchanged for all HOLLAND Kingpins.

A level 3 PPAP submission process has been completed, along with required metallurgical and laboratory durability testing.

**KP-AAR
CRUCIFORM STYLE**

**KP-AAR-L
'L' SERIES STYLE**
